We know that you are performance driven, whether that be to improve lean body mass or compete at a higher level. Dymatize developed the new **PerformanceDriven** line with your goals in mind via Pre, Intra and Post training support.^x

Net gains in muscle are the result of maximizing muscle protein synthesis (anabolism) combined with minimizing muscle protein breakdown (catabolism). You have to address both to accelerate gains!

Dymatize M•P•S is formulated to accelerate your gains in muscle size and strength resulting from training.^x One scoop post-workout is all you need.

- 7 grams of instantly soluble BCAAs (2:1:1) delivers ample leucine to trigger muscle protein synthesis for faster muscle building and recovery
- HICA and KIC are two key leucine metabolites that help promote gains in size and strength by supporting net muscle protein development in response to a strenuous training^x
- 2.4g of whey protein isolate supports muscle protein synthesis^x

Clean tasting and refreshing, **M•P•S** is the perfect muscle builder to take after your workouts.^x

DIRECTIONS: As a dietary supplement, take 1 scoop (provided) with 10-12 oz. of water or other beverage. Mix/Shake until dissolved. Foaming may occur initially with agitation, but will subside.

Warning: Consult a physician before using this or any other product, if you are pregnant, lactating, or have any medical condition. KEEP OUT OF REACH OF CHILDREN.
