

PhysioLogics®

PRODUCT BENEFITS: SAM-e is involved in over 35 biochemical reactions involving enzymatic transmethylation.* The methylation process is the mechanism by which the body rids itself of potentially damaging compounds, synthesizes neurotransmitters, regulates enzyme activity within the cell and maintains the flexibility of cell membranes.* Scientific studies have shown that SAM-e can promote mood and emotional well-being.*

A NOTE ABOUT OUR ENTERIC COATING: The enteric coating helps the breakdown of SAM-e occur in the small intestine.* In addition, the enteric coating is designed to protect SAM-e from moisture and serve as a protective barrier so that SAM-e can be absorbed where it can provide you with the greatest benefits.*

Directions: For adults, we recommend taking one (1) tablet one to three times daily, preferably on an empty stomach. In order to obtain maximum benefits, SAM-e should be taken at least 30 minutes prior to a meal or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.

WARNING: If you are pregnant, nursing or taking any medications, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur.

TAMPER RESISTANT: Do not use if blister seal is cut, torn or open.
KEEP OUT OF REACH OF CHILDREN. Store in a dry place and avoid excessive heat.
