

PRODUCT BENEFITS: Scientific evidence demonstrates that diets that include phytosterols may reduce the risk of coronary heart disease. Our specialized formula exceeds strict quality standards for levels of phytosterols (beta-sitosterol, stigmasterol, and campesterol) - the active ingredients that help maintain cholesterol levels already within a normal range.*

Directions: For adults, take two (2) softgels twice daily with your two largest meals of the day or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.

Diets low in saturated fat and cholesterol that include 2 g per day of plant sterols eaten with meals or snacks may reduce the risk of heart disease. A serving of Phytosterol Complex supplies 0.5 g of plant sterols.
