MuscleTech® is the Leader in Science with a Multi-Million Dollar Research Budget A portion of every dollar spent on MuscleTech® supplements is allocated toward scientific research to discover new and more effective ways to increase lean muscle and strength, and improve athletic performance. In fact, Team MuscleTech® researchers have collaborated with researchers at over 20 universities and research facilities around the world to study the various key ingredients found in our powerful formulas.

Platinum Pure CLA Powder – Platinum Pure CLA Powder is an advanced and completely tasteless powder that mixes instantly in any shake – you can even drink it on its own. Platinum Pure CLA Powder starts by using only the highest quality filtered conjugated linoleic acid (CLA). We then use a multi-phase process that concentrates the CLA molecules. CLA has been clinically studied and shown to support muscle growth. Researchers believe it works by down-regulating the TNF-alpha catabolic signaling molecule in muscle, thereby preventing your body from destroying lean muscle mass. In one clinical study, subjects taking 5g of CLA per day built 6 times more muscle than those using a placebo (2.8 lbs. vs 0.4 lbs.) in just 7 weeks. In the same study, resistance-trained male subjects significantly increased their bench press. If that's not enough, Platinum Pure CLA Powder is completely free of stimulants, making it an excellent addition to your musclebuilding stack.*
