

MTTM THE MOST POWERFUL SUPPLEMENTS ON EARTHTM

At MuscleTech[®], our researchers are passionate about supplements. Our mission is to develop the most scientifically advanced and effective supplements to help you build muscle and strength, lose weight, and improve athletic performance. Thanks to our millions of loyal customers, we are fortunate to be the most-awarded and best-selling sports nutrition brand over the past 20 years.

Many supplement companies do not disclose their ingredients, and don't invest in science and research, or quality control. We are different. MuscleTech[®] invests millions in product research and development, and quality control – and our supplement facts always tell you EXACTLY what you are getting: The Most Powerful Supplements on Earth!

MuscleTech[®] is the Leader in Science With a Multi-Million Dollar Research Budget – A portion of every dollar spent on MuscleTech[®] supplements is allocated toward scientific research to discover new and more effective ways to increase lean muscle and strength, and improve athletic performance. In fact, Team MuscleTech[®] researchers have collaborated with researchers at over 20 universities and research facilities around the world to study the various key ingredients found in our powerful formulas.

Platinum 100% Carnitine – Platinum 100% Carnitine supplies the most researched form of L-carnitine, L-carnitine L-tartrate, which is an amino acid metabolite that acts as a co-factor to help transport fatty acids to the mitochondria. Mitochondria are responsible for cellular energy production. L-carnitine has been shown to promote recovery following resistance exercise by minimizing muscle damage. In fact, in recent clinical research at a leading university, subjects supplementing with just 1g of L-carnitine experienced improved muscle recovery post-training.⁴ What's more, the non-stimulant properties of Platinum 100% Carnitine make it the perfect addition to your favorite diet supplement stack!
