

PRODUCT BENEFITS: Probiotics support a favorable environment for duodenum-jejunum nutrient absorption, encourage gram-positive Lactobacilli intestinal balance and promote the health of the intestines.* The mechanisms through which Acidophilus acts have been attributed to factors such as production of the heat-stable protein Lactacin F, bio-enzymatic lactic acid production, acid-resistance in the alimentary tract, and positive effects on fecal enzyme concentrations.* Nutritionally support your gastrointestinal health daily with PhysiLogics' all natural strawberry flavored chewable Acidophilus.*

Directions: For adults, chew one (1) wafer three times daily preferably with a meal or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
