

PRODUCT BENEFITS: Both Coenzyme Q-10 and L-Carnitine have essential biochemical roles for supporting heart function and energy production at the cellular level.* Co Q-10 is an essential component of the mitochondrial respiratory chain, which produces ATP needed for virtually all cellular processes.* L-Carnitine is responsible for transporting fatty acids into the mitochondria so they can be used for energy production.*

Directions: For adults, take one (1) softgel two to four times daily, preferably with meals, or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.

WARNING: If you are pregnant, nursing, taking any medications or planning any medical procedure, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur.
