

SUGGESTED USAGE: A chewable dietary supplement. Adults: Chew 2 tablets with or before each meal. Children (ages 3 & up): Chew 1 tablet with or before each meal. Or use as directed by your healthcare practitioner. **Keep lid tightly sealed.**

HOW IT WORKS: Modern lifestyles and eating habits can sometimes interfere with quality of nutrition, as well as with healthy digestion.* ProtoZymes™ is a broad spectrum digestive enzyme formulation designed to support optimal breakdown and absorption of proteins, fats, and carbohydrates, including lactose, to ensure maximum nutritional value for you and your children.* Controlled laboratory studies show that these enzymes are not degraded by stomach acid and are active throughout the entire pH range of the digestive system.* ProtoZymes™ has been designed especially for children, but it can also be used by adults to enhance bioaccessibility of nutrients consumed in foods.*

CAUTIONS/INTERACTIONS: There are no known drug interactions. www.protocolforlife.com/P2957

Do Not Eat Freshness Packet. Keep in Bottle.
