

SUGGESTED USAGE: As a dietary supplement, take 1 capsule daily, or as directed by your healthcare practitioner.

HOW IT WORKS: PQQ Complex is formulated for the support of optimal mitochondrial health and energy production.* PQQ (Pyrroloquinoline Quinone) is a vitamin-like nutrient that activates cell signaling pathways directly related to cellular energy production.* PQQ also promotes the formation of new mitochondria within cells and helps to protect mitochondria from free radicals generated during normal cellular respiration.* PQQ Complex includes CoQ₁₀ and Acetyl-L-Carnitine, two nutrients that also play critical roles in mitochondrial energy production.*

CAUTIONS/INTERACTIONS: Acetyl-L-Carnitine may interact with warfarin and acenocoumarol. If you are taking either of these medications, consult your healthcare practitioner before using this product. For more information on this product go to www.protocolforlife.com/P3168

Do Not Eat Freshness Packet. Keep in Bottle.
