

PRODUCT BENEFITS: PhysioLogics' Coenzyme Q-10 Q-Sorb 75 mg softgels provide an essential component of the mitochondrial electron transport chain, vital for the production of adenosine triphosphate (ATP) required for virtually all cellular processes. By supporting the normal physiologic function of the heart, Co Q-10 promotes healthy circulation through myocardial tissue. Co Q-10 is a lipophilic antioxidant which neutralizes the formation of free radicals.*

Directions: For adults, take one (1) softgel twice daily, preferably with meals or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
