Liver Fractions™ is a superior source of heme iron and other blood building nutrients. Studies have suggested that liver contains many of the necessary nutrients to maintain a healthy and vigorous life. Further studies have shown that it significantly increases energy and stamina. Liver contains a source of iron bound to hemoglobin (heme iron) of which up to 33% is absorbed compared to non-heme iron, which can have as little as 2% absorption.

Liver Fractions™ contains predigested and concentrated beef liver fractions from animals raised in Argentina without the use of chemical sprays, pesticides or antibiotics. It takes 20 lbs. of liver to make 1 lb. of high-potency extract. Free of fat and cholesterol. Unique liver fraction is non-toxic and non-constipating.*
