

The Ultimate Flora Probiotic Difference

Higher Culture Count

Ultimate Flora RTS Senior Care Probiotic is a high culture count, daily probiotic specifically formulated with 100% Bifidobacteria for adults over 50. Each capsule has 30 billion live cultures of 6 strains of beneficial flora.*

One Capsule Per Day

= 30 BILLION

Why take 6 or more capsules of another probiotic when just one **Ultimate Flora RTS Senior Care Probiotic** capsule equals 30 billion live cultures!

Delayed Release Capsule

Without Delayed Release

Ultimate Flora Delayed Release

Stomach acid can destroy probiotics. **Ultimate Flora** delayed-release capsules are designed to resist stomach acid more than standard capsules.

No Refrigeration Required

Ultimate Flora RTS (Room Temperature Strains) capsules are conveniently sealed in a double-foil blister to shield the probiotics from moisture and oxygen, prolonging potency at room temperature. Refrigeration, while not required, can be helpful during summer months.

Superior Health Begins in the Digestive System*

How is Ultimate Flora Different?

Ultimate Flora RTS (Room Temperature Strains) Senior Care Probiotic contains 6 strains of Bifido probiotics working differently to help optimize your digestive health.* Your large intestine, or colon, naturally has many different strains of Bifido probiotics, so more Bifido strains may be better for overall colon health.*

Why Take Ultimate Flora?

As we age, our level of Bifidobacteria declines. Ultimate Flora RTS Senior Care Probiotic contains 100% Bifido to help maintain a healthy colon environment.*

What to Look For in a Senior Care Probiotic:

- ✓ Multiple Bifido probiotic strains
- ✓ High culture count of Bifido strains
- ✓ Delayed release capsule
- ✓ Potency until time of consumption

Brenda Watson is a leading expert on natural digestive care. Her Ultimate Flora probiotics are formulated to help balance the digestive system, and promote regularity and vibrant health.*
