To assure optimal extraction of resins and other bioactive compounds, the rhizomes & rootlets are hand-harvested only in the autumn. They are carefully shade-dried, aged for one year to neutralize irritating compounds, and are then thoroughly extracted.

We prepare our Culver's Root Extract from the rhizome & rootlets of *Veronicastrum virginicum* plants which are **Certified Organically Grown** on our farm or are **Custom Wildcrafted™** in their wild native habitat.

005

LIQUID HERBAL EXTRACT
