

The Ultimate Flora Probiotic Difference

Higher Culture Count

Ultimate Flora RTS Extra Strength Probiotic is a high culture count, daily probiotic to help build digestive health. Each capsule has 30 billion live cultures of 10 strains of beneficial flora.*

One Capsule Per Day

= 30 BILLION

Why take 6 or more capsules of another probiotic when just one Ultimate Flora RTS Extra Strength Probiotic capsule equals 30 billion live cultures!

Delayed Release Capsule

Without Delayed Release
Ultimate Flora Delayed Release

Stomach acid can destroy probiotics. Ultimate Flora delayed-release capsules are designed to resist stomach acid more than standard capsules.

No Refrigeration Required

Ultimate Flora RTS (Room Temperature Strains) capsules are conveniently sealed in a double-foil blister to shield the probiotics from moisture and oxygen, prolonging potency at room temperature. Refrigeration, while not required, can be helpful during summer months.

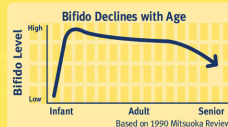

Superior Health Begins in the Digestive System*

How is Ultimate Flora Different?

Ultimate Flora RTS (Room Temperature Strains) Extra Strength Probiotic contains 10 beneficial Bifido and Lacto probiotic strains working together differently to help optimize your digestive health.* Since you have many different strains of probiotics in your intestinal tract, more strains may be better.*

Why Take Ultimate Flora?

As we age, our level of Bifidobacteria declines. Ultimate Flora RTS Extra Strength Probiotic contains 60% Bifido to help maintain a healthy digestive environment.*

What to Look For in an Extra Strength Probiotic:

- ✓ At least 10 probiotic strains
- ✓ High culture count with Bifido and Lacto strains (B's and L's)
- ✓ Delayed release capsule
- ✓ Potency until time of consumption

Brenda Watson is a leading expert on natural digestive care. Her Ultimate Flora probiotics are formulated to help balance the digestive system, and promote regularity and vibrant health.*
