

ActiFruit™

CRANBERRY SUPPLEMENT

ActiFruit Has More PACs

Proanthocyanidins (PACs) are a class of flavonoids found in fruits and seeds that provide antioxidant benefits. But not all antioxidants support urinary tract health. A-type PACs from cranberries provide urinary tract benefits.*1

Cranberries contain Type-A Proanthocyanidins (PACs), which are the key actives in cranberry that support urinary tract health.

ActiFruit delivers more PACs

ActiFruit

Typical Cranberry

PAC Potency

ActiFruit is standardized from unique varieties of cranberries, including *Early Black*, which contain a higher natural potency of PACs.
