BETTER HEALTH THROUGH BETTER DIGESTION*

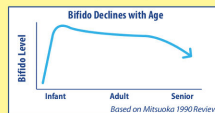

WHAT ARE PROBIOTICS?

Probiotics are good bacteria that naturally occur in the digestive tract and help us digest food, absorb nutrients, support our immune system, and promote balance in the digestive tract.* An imbalance of bacteria in the intestinal tract may lead to occasional digestive upsets.

WHY TAKE PROBIOTICS?

Age, poor diet, and stress deplete our bodies of billions of good bacteria which could lead to digestive upsets such as gas, bloating, and occasional constipation.

Having a good balance of bacteria is important to help avoid these digestive issues and maintain good digestive and immune health.*

ULTIMATE FLORA WITH BENEFICIAL PROBIOTIC BACTERIA

Ultimate Flora strains are carefully selected for their specific health benefits.*

- *Bifidobacteria* Probiotic Strains – Replenish vital bacteria in the large intestine (colon)*
- *Lactobacillus* Probiotic Strains – Boost beneficial bacteria in the small intestine*

Ultimate Flora has multiple probiotic strains that work differently to help optimize your digestive health.*
