

0 90700 00191 9

To assure optimal extraction of Muira Puama's bioactive compounds, the main stem (with bark) of the plant is hand-harvested and carefully sun-dried, and is then shipped directly to our laboratory for thorough extraction.

We prepare our Muira Puama Extract from the stem of *Ptychopetalum olacoides* shrubs which are **Custom Wildcrafted™** in their native wild habitat in the Amazon region of Brazil.

004

LIQUID HERBAL EXTRACT

MUIRA PUAMA

Ptychopetalum olacoides
Stem with Bark
