## UNCONDITIONALLY GUARANTEED

Dieter's Choice for Carb Control® works in the intestines – exactly where you need it – to reduce the activity of the amylase enzyme that promotes carb absorption. Taken before meals that contain starch carbohydrates, it helps you absorb less calories, so you can maintain the weight you want. Because this extract maximizes white kidney bean potential in a small dosage, you get the benefits *without* the gas and bloating of unpurified products.\*  
For best results, use Dieter's Choice for Carb Control® along with a sensible diet and exercise program. As with any weight loss program, consult a physician. UNCONDITIONALLY GUARANTEED

Dieter's Choice for Carb Control® provides highly purified and concentrated Max-Phase™ phaseolamin, protected by Sure-Release™ enteric coating, so you only need one tiny tablet per meal.  
Reduce your absorption of carbohydrate calories – without problematic gas or bloating!

Dieter's Choice for Carb Control®  
Lab Tested for Safety and Efficacy
