

Nature's Way Garlicin®

ODOR-FREE GARLIC

SCIENTIFIC RESEARCH SHOWS
**ALLICIN IS ESSENTIAL FOR
GARLIC'S HEALTH BENEFITS.**

TO DELIVER THE CLINICALLY PROVEN **ALLICIN** POTENCY, AN EFFECTIVE GARLIC SUPPLEMENT MUST HAVE THE FOLLOWING:

High Enzyme Activity

Garlic is unique among herbs because its active compound, *allixin*, is not present until the special enzyme *alliinase* is activated. This occurs when garlic is crushed or moistened. Garlicin® is made from a superior garlic powder, specially processed to deliver maximum *alliinase* activity.

100% Stomach Acid Protection

In only two seconds, stomach acid completely deactivates *alliinase* thus eliminating the potential for *allixin* production. Garlicin's proprietary enteric-coating provides over two hours of acid protection delivering the tablet and its *alliinase* safely to the intestine.

Rapid Disintegration

Once in the intestine the garlic tablet must rapidly disintegrate in order to fully activate the *alliinase* enzyme and produce *allixin*—all in about 45 minutes!

Only Garlicin® has been proven to disintegrate this fast and release its claimed *allixin* potency.

Nature's Way Garlicin®

ODOR-FREE GARLIC

Cardiovascular Health

with **SmartRelease®**

Exceeds clinically
proven *allixin*
release potency

100% stomach
acid protection

Rapid
intestinal
release

60 Enteric-coated tablets
Dietary Supplement

Nature's Way Garlicin®

ODOR-FREE GARLIC

Recommended Dose: For clinical effectiveness take 1 tablet twice daily with meals or as recommended by your healthcare professional. For general maintenance take 1 tablet daily.

Note: Consult with your doctor if you have a disease or health-related condition that requires the lowering of cholesterol.

Actual Tablet Size

Allicin Release as Percent of Label Claim

USP Test 724A

Top 22 enteric-coated
brands tested
against Garlicin®.

Accurate Allicin Release Measurement:

Simply dissolving crushed garlic tablets in water can produce a high *allixin* release. But when the same tablets are tested under gastrointestinal conditions according to US Pharmacopoeia test method 724A, their actual *allixin* release (as will be produced within the body) is significantly less. Using this more sophisticated test method, Garlicin® is the only leading enteric-coated brand to meet its *allixin* release as stated on the label.

The SmartRelease® Difference:

Garlicin's proprietary enteric-coating provides 100% protection from stomach acid. Once in the intestine, Garlicin® completely disintegrates in about 45 minutes providing maximum *allixin* release. Clinical studies show that 3600-5400 mcg of *allixin* per day is effective in maintaining cardiovascular health.* This level is exceeded by taking two Garlicin® tablets daily.
