

THE MOST POWERFUL NON-STIMULANT PRE-WORKOUT PILL¹

Peak SX-7™ is the most powerful pre-workout pill on the market today. Many pre-workout pills and powders give you energy and a “buzz,” – but how many can legitimately help you add lean muscle and extreme strength gains in just 12 weeks?¹ Time to leave your old pre-workout behind.

How Does It Work?

Research suggests the key compound in Peak SX-7™ works using three distinct pathways. The first pathway helps increase blood flow to deliver more oxygen to hard-working muscles, allowing them to work even harder. The second mechanism of action is to help your muscles control ionic flux during contractions so they can recover and contract faster. The third and most important pathway of action is when Peak SX-7™ triggers the anabolic mTOR pathway – this puts your muscles in “musclebuilding” mode.¹

Subjects Gained More Muscle & Strength Than Subjects Using a Placebo in a 12-week Clinical Study

Researchers at the prestigious University of Tampa conducted a randomized, double-blind, placebo-controlled clinical study done over 12 weeks on very well-trained athletes.

¹Subjects gained 8.8 lbs. of lean muscle versus the placebo group, who only gained 4.6 lbs.¹ The results were breakthrough!
