

Typical Amino Acid Profile - Each serving contains:

Essential Amino Acids		Non-Essential Amino Acids	
L-Leucine*	2619 mg	L-Arginine	853 mg
L-Isoleucine*	1981 mg	L-Aspartic Acid	2486 mg
L-Valine*	1447 mg	L-Cystine	255 mg
L-Lysine	2224 mg	L-Alanine	932 mg
L-Threonine	1941 mg	L-Glutamic Acid	3955 mg
L-Methionine	350 mg	L-Glycine	414 mg
L-Phenylalanine	732 mg	L-Histidine	365 mg
L-Tryptophan	552 mg	L-Proline	642 mg
		L-Serine	670 mg
		L-Tyrosine	582 mg

* Total Branched Chain Amino Acids (BCAAs) 6047 mg
Total Essential Amino Acids (EAAs) 11846 mg
Total Amino Acids 23000 mg

DIRECTIONS: Mix 1 scoop (26 grams) of Ultimate Nutrition IsoCool™ into 8oz of water, juice or milk. For a thicker shake, mix into 4oz of water, juice or milk. Ultimate Nutrition IsoCool™ mixes well, and can be prepared in a blender, shaker cup, or in a glass with a spoon. For maximum muscle growth, take before and after your workout.

Ultimate Nutrition IsoCool™ is produced through an exclusive and innovative technology called ColdPure® ultrafiltration. ColdPure® ultrafiltration isolates the native whey protein in a highly bioactive form using an advanced low temperature ultrafiltration process. ColdPure® ultrafiltration produces a superior bioactive whey that is non-denatured and contains the highest content of essential amino acids (EAA's) and branched chain amino acids (BCAA's). ColdPure® ultrafiltration provides you with a great tasting protein shake with zero carbohydrates, sugar and fat. Each serving of Ultimate Nutrition IsoCool™ contains 23 grams of protein isolate per serving.

Protein plays a number of different roles in the body including repairing body cells, building and repairing muscles and bones, providing a source of energy, and controlling many of the important processes in the body related to metabolism. Whey protein is a high quality, complete protein, with all of the essential amino acids. Whey protein is also the richest known source of naturally occurring branched chain amino acids (leucine, isoleucine and valine). These are important for active individuals, individuals who exercise and professional athletes. The body requires higher amounts of branched chain amino acids during and following exercise as they are taken up directly by the skeletal muscles instead of being metabolized through the liver first, like other amino acids. Fuel your muscles with the protein they need with Ultimate Nutrition IsoCool™!
