

African Mango?

The rare and powerful *Irvingia Gabonensis* seed of African Mango has long been known to the tribes of Cameroon for its fat burning, antioxidant, and appetite suppressing properties. Now you too can join the celebrities and super-food insiders that are taking advantage of its rapid weight loss and detoxifying benefits, with NO side effects!

A 10 week double-blind, placebo-controlled research study from the Institute of Medicinal Plant Studies in Yaoundé, Cameroon showed African Mango produced tremendous results in many key weight loss variables including body weight, body fat and waist size. Further enhancing this formula is Green Tea extract which has also been shown in numerous clinical studies to possibly help promote weight loss. This exciting combination can play a key role in weight and body fat reduction when used in conjunction with a calorie-controlled diet and exercise program.
