

African Mango?

The rare and powerful Irvingia Gabonensis seed of African Mango has long been known to the tribes of Cameroon for its fat burning, antioxidant, and appetite suppressing properties. Now you too can join the celebrities and super-food insiders that are taking advantage of its rapid weight loss and detoxifying benefits, with NO side effects!

MANGODRIN™ SF is a revolutionary fat burner. We didn't just take out the stimulants; we went back to the drawing board. Not only did we keep the clinically proven Irvingia Gabonensis (African Mango) but we added Cissus Quadrangularis. This Synergistic combination amplifies the properties of both ingredients. **MANGODRIN™ SF** is protected under 6 US Patents and carries multiple clinical studies - Ensuring you the strongest fat burner available... without stimulants!
