

****Supportive but not conclusive research shows that consumption of EPA and DHA Omega-3 fatty acids may reduce the risk of coronary heart disease. See nutrition information for total fat and cholesterol content.**

Odorless Fish Oil contains EPA and DHA, two Omega-3 fatty acids that help support and maintain the health of your cardiovascular and circulatory systems.* Omega-3 fatty acids are considered one of the "good" fats and help maintain triglyceride levels already within a normal range.* Odorless Fish Oil is enteric coated to minimize annoying fish burps and aftertaste. Nature's Bounty Fish Oil is purified to eliminate heavy metal contaminants such as mercury, PCBs and dioxins.
