

IMMUNE FACTORS*

Symbiotics® Proline Rich Polypeptides with Colostrum PLUS® is one of the most concentrated forms of proline-rich polypeptides (PRPs) available as a dietary supplement. Newborns who breastfeed get a head start in immunity through the PRP's and other immune factors they get from their mother's Colostrum. This is often called "Passive Immunity." Symbiotics® Proline Rich Polypeptides with Colostrum PLUS® adds back PRPs that you can't get from any other kind of dietary supplement.*

PRPs are extracted from bovine colostrum – dairy cows are the most abundant source of raw colostrum available today. The PRPs in bovine colostrum are the same as all other mammals and can be used as a health supplement for all other mammal species, including humans.

The potency of each PRP Powder batch is analytically validated using a HPLC/UV/MS system. It is specified to contain a minimum of 8% PRPs and it's coated with Symbiotics BIO-lipid™ coating to ensure peak bioavailability.*

Immuno® Powder comes from USDA Grade A dairies that are hormone, pesticide, antibiotics and rBST free. We use only the first 2 milkings to guarantee potency and quality.

Quality and Purity Guaranteed - We guarantee that this product meets the highest standards of quality, purity and freshness. Each bottle is safety wrapped with an outer neckband and inner seal. Do not use if outer neckband is broken or missing.
