

IMMUNE FACTORS*

Symbiotics® guarantees a minimum 40% level of IgG immunoglobulins in its Colostrum High IG™ for people who want extra support from this specialized Colostrum component. That's 20 times the level in normal human Colostrum! As the smallest immune factor, IgG readily enters the circulation and enters tissues that larger molecules can't penetrate. Colostrum High IG is an important consideration for those with GI tract stress and for athletes or others whose bodies are under physical stress. Increased immunoglobulin levels aid nutrient absorption. High IG is hormone, pesticide, antibiotic and rBST free.*

Fight back with Colostrum High-IG™ Your immune defense system gets depleted as you age. Symbiotics® Colostrum High-IG adds back the full range of immune factors including IgA, IgD, IgE, and IgM, as well as IgG, for dual action in the bloodstream and also in the GI tract. It helps maintain a robust intestinal lining and promotes healthy intestinal flora. Its growth factors enhance stamina and support normal re-growth of tissue and lean muscle. Clinical studies show wide ranging health benefits.* We use only the first 2 milkings to guarantee potency and quality.

Quality and Purity Guaranteed - We guarantee that this product meets the highest standards of quality, purity and freshness. Each bottle is safety sealed with an outer neckband. Do not use if neckband is broken or missing.
