PROBIO-DAILY

lactobacillus sporogenes

DIRECTIONS: Take 1 tablet up to 3 times a day (children over 8 years, 1-2 tablets a day), with meals, or as your health professional advises. Do not exceed recommended daily intake.

Food supplements should not be used as a substitute for a varied and balanced diet and healthy lifestyle.

Lactobacillus sporogenes, unlike many probiotics, survives stomach acids well because it is in 'spore' form, and is ideal for travel because it does not need to be refrigerated.

Suggested uses:

- especially during and after taking antibiotics.

No refrigeration required if stored at room temperature. Exposure to excessive heat should be avoided.

This bottle has a UV filter.

Keep out of reach of children. Ensure lid is tight and store in a cool, dry, steam-free environment as damp conditions can affect the product quality.
