IMMUNE FACTORS*

Helps maintain normal levels of *Candida albicans* bacteria! It's normal to have *Candida albicans* in the body, but it's critical to keep it in balance. *Candida* actually kills harmful bacteria and is food for "friendly" bacteria that keep our system working properly. Candida Balance™ works through 3 different mechanisms of action. Lactoferrin robs *Candida* of iron needed for growth. *Bifidobacterium* are added to promote GI tract health and feed on *Candida*. Colostrum Plus® adds IgG, PRPs, and other immune factors, to promote overall immune health.*

Symbiotics guarantees minimums of 28 mg Lactoferrin, 175 mg immunoglobulins and 20 mg Proline-Rich Polypeptide (PRPs), Colostrum's most important component. Our unique Bio-lipid® coating ensures bio-availability. Without this protective layer, other Colostrum products can be destroyed by stomach acids and offer limited benefit.

Colostrum Plus® comes from USDA Grade A dairies that are hormone, pesticide, antibiotic and rBST free. We use only the first 2 milkings to guarantee potency and quality.

Quality and Purity Guaranteed - We guarantee that this product meets the highest standards of quality, purity and freshness. Each bottle is safely sealed with an outer neckband. Do not use if neckband is broken or missing.
