

ACID BLOCK is a combination of nutrients designed to provide relief of intermittent heartburn and indigestion.* Alginic acid and sodium alginate react with saliva and gastric acid to form a foamy froth or alginic raft that floats on top of the gastric contents and acts as a barrier to acid and food reflux. Slippery elm and deglycyrrhized licorice act as demulcents which are soothing to the alimentary canal.*

Contains no yeast, dairy, eggs, gluten, corn, wheat, starch, artificial colors or preservatives.

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.
