

THE BONE DENSITY FORMULA is a physician-formulated dietary supplement which provides calcium, magnesium, boron and other vital nutrients to enhance bone density and strength.* Magnesium and boron have been shown to increase calcium absorption and utilization.

Clinical studies have demonstrated that regular exercise and a healthy diet with enough calcium helps teens and young adult white and Asian women maintain good bone health. For all persons with a family history of osteoporosis, menopausal women, and elderly men and women, adequate calcium is linked to a reduced risk of osteoporosis through the mechanism of slowing the rate of bone loss.

For growing teenagers who do not get adequate calcium in their diet, calcium supplementation is recommended.

Contains no yeast, dairy, eggs, gluten, corn, soy or wheat, sugar, starch, salt, preservatives or artificial color or fragrance. The gelatin capsules are hypoallergenic.
