THIS IS WHAT ACTIVE HYDRATION IS ALL ABOUT

When active, you sweat. When you sweat, you become dehydrated. When dehydrated, you may as well go home — there's no way you'll be on your game. Even a scant 2% dehydration can noticeably hinder your physical and mental performance. Chugging water to “catch” up won't be much help either — during activity it takes too long to absorb. In fact, water will likely slosh around in your stomach and cause discomfort.

That's why we developed FLOOID, the scientific approach to hydration. It has proper osmolality (oz-mole-at-a-leaf). For you this means quicker-than-water hydration where you need it most — out of your gut and into your body to give you ENDURANCE. To stay in top form, you need more than hydration alone — you need energy, you need to replace lost electrolytes, and you need to preserve muscle. FLOOID brilliantly includes a 3:2:1 blend of energy-yielding carbohydrates plus replenishing electrolytes to POWER your performance. To protect muscle, FLOOID even supplies BCAA amino acids that support PERSEVERANCE to keep you pushing limits.†
