

TESTOSTERONE SUPPORT MATRIX

RECOMMENDED USE: As a dietary supplement, take three capsules daily, preferably with meals. Unlike most other testosterone formulas, **TRIPLE TEST™** does not need to be cycled. This is important in maintaining more consistent testosterone levels compared to products that are cycled, which greatly disrupts natural hormone balance.

TRIPLE TEST™ stands alone as a total support system for optimizing testosterone levels. Testosterone has many important functions in the body such as helping to build muscle, burn fat, and increase strength & performance. It's also necessary to promote energy levels and sex drive. However, as men age, testosterone levels decline. Even less obvious factors than age, such as environmental estrogens and pollutants, can lower testosterone levels. The result is a less muscular, out of shape, less energetic version of yourself. Fighting this decline in testosterone is necessary; not only to maintain youthful levels of lean body mass and low levels of body fat, but also to maintain strength, energy, and of course, sex drive. Testosterone works synergistically with all of the anabolic hormones of the body, such as Insulin-like growth factor and growth hormone.[†]

Contains no banned substances. Clean Athlete approved.
