Whey Delite™ is our gourmet protein complex available in four unique flavors specifically formulated to satisfy your taste buds and support your nutrition regimen any time of the day. Each flavor of Whey Delite™ offers fruit pieces or chocolate chunks in combination with our high quality complex of protein that will complement any training regimen by supporting the growth of lean muscle tissue and the maintenance of bone health.*

Whey Delite™ contains a unique combination of whey, milk and casein proteins, which help to provide the body with all the necessary amino acids, including the nine essential amino acids the body is unable to synthesize naturally (i.e. Histidine, Isoleucine, Leucine, Lysine, Methionine, Phenylalanine, Threonine, Tryptophan, Valine).*

The nutritional quality is determined by the extent to which dietary protein nitrogen is absorbed and retained by the body to balance daily nitrogen losses. Net Protein Utilization (NPU) is the percentage of ingested nitrogen that is retained in the body, and the Biological Value (BV) gives the percentage of absorbed nitrogen that is retained. BV is the product of the NPU after digestive processes. Whey protein is highly digestible, offering a high amino acid composition, and in turn, resulting in a high BV. With a higher BV, Whey Delite™ has been suggested to offer a more nutritionally beneficial formula as compared to other dietary protein sources such as meat, fish, eggs or soy.*
