- A PHASE #1 Rapid Release Exterior Liquid Capsule:** The exterior liquid phase of the multi-phase capsule ensures a rapid and almost instant onset of the liquid phase and energizing ingredients. Within minutes of taking the multi-phase capsules the liquid phase is released and you begin to feel these actives working for you.
- B PHASE #2 8 Hour Sustained Release Interior Capsule:** Unlike leading competitors formulas in the past, which come and go quickly, Health International's Products continue to work for you over an extended period of time of 8 hours. By formulating some of the active ingredients in the form of beads into a separate interior capsule that is placed inside the liquid capsule, the absorption rate can now be controlled thanks to the INNERCAP® patented multi-phase, multi-compartment technology. This GREATLY extends the amount of time these ingredients are active in your system working for you when you need them.
- C Multi-Phase Capsule:** INNERCAP's® multi-phase technology is the first and only multi-phase nutritional delivery system that offers speed and duration. A quick and rapid onset of its active ingredients combined with controlled and extended sustained release unmatched in the nutritional industry will insure maximum results all day long. Health International Products is extremely proud to have been chosen by INNERCAP® to be able to bring this multi-compartment, multi-phase technology to the public today to take the nutritional industry to the next level of performance and beyond. Unmatched and like nothing you've ever experienced before in supplements, we know you will enjoy the exceptional results of this delivery system and product.

INNERCAP® MULTI-PHASE RELEASE TECHNOLOGY

The INNERCAP® patented delivery system is unique because it allows for the rapid release of a fast acting liquid phase in an exterior capsule with the controlled-release of a solid phase released from an interior capsule. The system is often referred to as a multi-phase, multi-compartment capsule. What this means to you is Health International Products provides products today that have true multiple release phases which provide fast and extended release benefits.
