

SUGGESTED USAGE: As a dietary supplement, take 1 softgel daily, or as directed by your healthcare practitioner.

HOW IT WORKS: Zinc is an essential mineral that is involved in many aspects of cellular metabolism.* Zinc is a key cofactor in hundreds of enzymatic reactions, and plays a critical role in protein synthesis, the maintenance of cellular structures, and cell signaling.* Because of these varied functions, Zinc is necessary for the maintenance of skeletal, neurological, reproductive, and immune system health.* Although dietary bioavailability of Zinc is relatively poor, Zinc Glycinate has been shown to achieve superior absorption and bioavailability.*

CAUTIONS/INTERACTIONS: Zinc may interact with cisplatin and many drugs can affect zinc status. Certain medications, including penicillamine, bisphosphonates, quinolone and tetracycline, may affect Zinc absorption. Take zinc supplements at least 2 hours before or after any drugs that may affect its absorption. Consult your healthcare practitioner before taking this product if you are taking any medications.

This bottle contains an AGELESS® Oxygen Absorber to ensure freshness. Do not eat packet.
