

Pro Performance® CreaDrive® supplies a scientifically studied blend of Carbohydrates, Creatine, Phosphates and Taurine in a great-tasting fruit punch supplement. This advanced formula is designed for well-trained athletes striving to go beyond their potential.

Creatine is one of the most popular sports supplements among athletes. In the body, creatine is converted to creatine phosphate which helps to fuel skeletal muscles and provides support for immediate energy production during high-intensity workouts.* Over the past several years, numerous studies have shown that creatine supplementation may help to improve athletic performance and promote cellular hydration.*

Eight weeks of supplementation with the CreaDrive formula in male collegiate athletes during off-season training produced significant increases in several performance variables compared to those athletes taking 34g carbohydrate formula alone.* Subjects taking the CreaDrive formula displayed increased performance in the bench press, vertical jump and 100 yard dash compared to those taking the carbohydrate formula alone.*

GNC PRO PERFORMANCE®
