

Hyper-Anabolic Post-Workout Muscle Growth Accelerator*

Faster Absorption Than Whey – Stimulates Protein Synthesis* – Significantly Spikes Insulin*
Helps Maximize Creatine Uptake and Glycogen Replenishment**

Don't waste another workout! If you want to start gaining serious size, chug down some DARK MATTER and introduce your muscles to a new frontier of hyper-anabolic muscle growth. The greatest opportunity to stimulate muscle growth is immediately after your workout. The faster you can get critical nutrients into your bloodstream and muscles, the better. DARK MATTER employs new technologies and compounds that allow for super-fast nutrient uptake and help spark a synergistic anabolic reaction during which insulin levels peak with amino acid, creatine and glycogen transport at the "Anabolic Axis" to trigger enhanced muscle growth and speed recovery.*

ProSYNTHAGEN® Peptide: Increases Protein Synthesis and Spikes Insulin*

ProSYNTHAGEN Peptide is a research based combination of oligopeptides, insulinotropic amino acids, BCAAs in a potent leucine loaded 10:1:1 ratio and a concentrated source of glutamine peptides. Research shows that this combination of amino acids has powerful effects on stimulating protein synthesis, the release of insulin and replenishment of glutamine stores in muscle. Additionally, ProSYNTHAGEN Peptide is fine-tuned with a High Velocity Dual Portal Transport for even faster and greater intestinal uptake by combining powerful insulinotropic and anabolic free form amino acids with oligopeptides. These unique characteristics help give ProSYNTHAGEN Peptide a potent anabolic effect, which can result in enhanced muscle building and recovery.*

GLYCOSACCHARIDE-FST: Amplifies Anabolic Actions of Insulin and Replenishes Glycogen!*

GLYCOSACCHARIDE-FST is an advanced carbohydrate matrix comprised of three functional saccharides to optimize the post-workout anabolic actions of insulin and reload your muscles with glycogen. This advanced carb matrix of Homo-polysaccharide (derived from potato), Polysaccharide (derived from low viscosity, high molecular weight osmotic waxy maize starch) and Oligosaccharide (derived from Maltoplex-18 glucose polymers) allows for fast gastric emptying, a quick, powerful spike in insulin and enhanced glycogen replenishment. GLYCOSACCHARIDE-FST's carb matrix was scientifically developed to deliver a nutrient infusion to help elicit a greater insulin response and open the anabolic window faster and keep it open longer. To further enhance the anabolic effects of insulin, DARK MATTER contains the insulin amplifiers and optimizers 4-hydroxyisoleucine, chromium picolinate and guanidinoacetic acid, which help improve insulin signaling and sensitivity for increased anabolic action, nutrient transport, protein synthesis, creatine/nutrient uptake and glycogen replenishment.*

HYDROSIZE®: Multi-Phase Creatine Transport & Cell Volumizing Matrix*

To complete the optimal post-workout anabolic infusion, MHP's research team developed HydroSIZE, which is a multi-source creatine/glycerol complex for enhanced muscle volumizing and bioenergetic creatine loading into muscle tissue. This complex provides the right amount of creatine in the form of creatine monohydrate, creatine magnesium chelate and creatine gluconate to be quickly transported in tandem with amino acids and glycogen into muscle tissue during peaks in insulin for the replenishment of ATP and increased muscle cell volumizing.*

Every Workout Ends with DARK MATTER...

DARK MATTER is the result of the latest research on optimizing the post-workout anabolic window to help create maximum muscle gains and faster recovery. Research demonstrates the importance of precise supplementation for creating the proper post-workout environment of increasing protein synthesis, spiking insulin, restoring ATP and replenishing glycogen for enhanced muscle growth, performance and recovery. Drinking a DARK MATTER shake immediately after your workout will help create an anabolic muscle building environment so you can get the most out of your workouts and be your best.*

Dual Portal Transport**

DARK MATTER™

HYPER-ANABOLIC POST-WORKOUT MUSCLE GROWTH ACCELERATOR*

||| Utilizing Oligopeptides for Fast Absorption

||| Fast Impact Insulinotropic Amino Acids

||| Peptide Bonded Glutamine

||| 10:1:1 BCAA Complex Triggers Protein Synthesis*

||| Osmotic Carb Complex Spikes Insulin and Replenishes Glycogen*

- Keep out of reach of children.
- Store at 10° - 30°C (50° - 86°F).
- Protect from heat, light and moisture.
- Do not purchase if seal is broken.

DARK MATTER Hyper-Anabolic Growth Accelerator Matrix	35,000 mg	‡
GLYCOSACCHARIDE-FST Fast Acting Glycogen Replenishment and Insulin Spiking Complex (homo-polysaccharides from potato starch, oligosaccharides from Maltoplex-18™ Glucose Polymers, polysaccharides from Waxy Maize, (AMP Insulin Amplifiers [4-hydroxyisoleucine, guanidinoacetic acid and chromium picolinate]), ProSYNTHAGEN® Peptide: Protein Synthesis Accelerator (full spectrum oligopeptide amino acids from wheat protein hydrolysate (containing 30% glutamine peptides), 10:1:1 BCAA complex (L-leucine, L-isoleucine, L-valine) and L-phenylalanine), HydroSIZE®: Multi-Phase Creatine Transport and Cell Volumizing Matrix (creatine monohydrate, Creatine Magnapower® (as magnesium creatine chelate), creatine gluconate and glycerol monostearate).		

† Percent Daily Values are based on a 2,000 calorie diet. ‡ Daily Value not established.

Other ingredients: Malic acid, citric acid, natural flavors, silica, acesulfame potassium, sucralose, Red 40 Lake and Blue 1 Lake.
Contains wheat.

Directions: DARK MATTER is a Hyper-Anabolic Ultimate Post-Workout Muscle Growth Accelerator designed to be taken immediately after your workout. Add 1 scoop to 8 fl. oz. of water in a glass or shaker bottle immediately after training. (For maximum results, you may take 2 scoops with 16 fl. oz. of water.) Stir or shake vigorously before drinking.*
