Gesticare[®]DHA

Prenatal Multi-vitamin/Mineral Tablets with DHA and Choline

Not for Sale – Rx Only

Description:
 Gesticare® DHA includes a light pink coated oblong-shaped tablet with "P-114" debossed on one side of the tablet and a natural DHA softgel capsule containing a pale orange oil.

Each tablet contains:

Vitamin B1 (Thiamin Mononitrate)	3 mg
Vitamin B2 (Riboflavin)	3 mg
Vitamin B6 (Pyridoxine HCl)	50 mg
Vitamin B12 (Cyanocobalamin)	8 µg
Vitamin C (Ascorbic acid)	120 mg
Niacin (Nicotinamide)	20 mg
Folic acid	1 mg
Iron (Ferrous Fumarate)	27 mg
Calcium (Calcium Carbonate)	200 mg
Vitamin D3 (Cholecalciferol)	410 IU
Vitamin E (DL-Alpha Tocopheryl Acetate)	30 IU
Iodine (Potassium Iodide)	150 µg
Zinc (Zinc Oxide)	15 mg
Choline (Choline Bitartrate)	55 mg

Each DHA gelatin capsule contains:
 Docosahexaenoic Acid (DHA) from Algal Oil 250 mg
 Eicosapentaenoic Acid (EPA) Not more than 0.625 mg
 DHA is an omega-3 fatty acid. The DHA in Gesticare® DHA is derived from Algal Oil (C. cohnii). 625 mg of Algal Oil is equivalent to 250 mg of DHA.

Indications and Usage: Gesticare® DHA is indicated to provide vitamin/mineral and DHA omega-3 fatty acid supplement to women throughout pregnancy, during the postnatal period for both lactating and non-lactating mothers, and throughout the childbearing years. Gesticare® DHA may be beneficial in improving the nutritional status of women prior to conception.

Contraindications: This product is contraindicated in patients with a known hypersensitivity to any of the ingredients.

WARNING: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6 years of age. Keep this product out of the reach of children. In case of accidental overdose, call a doctor or poison control center immediately.

Warnings: Ingestion of more than 3 grams of omega-3 fatty acids per day has been shown to have potential antithrombotic effects, including increased bleeding time and INR. Administration of omega-3 fatty acids should be avoided in patients on anticoagulants and in those known to have an inherited or acquired bleeding diathesis.

Precautions: Folic acid in doses above 0.1mg daily may obscure pernicious anemia in that hematologic remission can occur while neurological manifestations remain progressive.

Adverse Reactions: Allergic sensitization has been reported following both oral and parenteral administration of folic acid.

Dosage and Administration: One Gesticare® tablet and one DHA capsule daily or as directed by a physician.

How Supplied: Gesticare® DHA is supplied as six child-resistant blister cards containing 5 Gesticare® tablets and 5 DHA capsules each – NDC 18860-253-30.

Do not use if blister seal is broken.
 KEEP THIS AND ALL MEDICATIONS OUT OF THE REACH OF CHILDREN.

Store at controlled room temperature 20°-25°C (68°-77°F); excursions permitted to 15°-30°C (59°-86°F).

To report a serious adverse event or obtain product information, contact (800) 890 3098.
