Liquid CoQ10 is a unique formula with 100 mg per serving of CoQ10 that has been supercharged with ConcenTrace®, a concentrated complex of over 72 naturally occurring ionic trace minerals from the Great Salt Lake.

Coenzyme Q10 is a vitamin-like nutrient that is naturally synthesized in the body and is found in every cell. It is a potent antioxidant and plays an important role in many functions in the body, including cell growth and maintenance, cardiovascular health, immune system support, and energy production.[†] The level of coenzyme Q10 slowly declines as the body ages, which warrants the need for supplementation to help maintain healthy levels.[†]

Suggested Use: Shake vigorously before use. Take 1 teaspoon (5 mL) daily at mealtime and spread serving throughout the day for best results. Mix with juice or take straight if desired. May also be taken sublingually. ConcenTrace® is a trade name for concentrated sea minerals from the Great Salt Lake.
