Vitamin D is one of the most important nutrients for health and is produced in the body naturally through regular sun exposure. However, exposing yourself to the sun without protection also has its risks.

Therefore, dermatology professionals recommend that one important way to attain a healthy intake of vitamin D is through supplementation. Adults striving to achieve optimum health and wellness who regularly avoid sunlight or use sun block are urged to supplement their body with at least 2,000 IU of vitamin D daily.¹

May we introduce **Vitamin D Pak**, a dietary supplement that provides 2,500 IU of all natural vitamin D₃ per serving, plus Calcium, Magnesium, Folic Acid, Potassium, and a full spectrum over 72 ionic trace minerals from ConcenTrace®. **Vitamin D Pak** gives you a variety of nutritional benefits in one compact and convenient packet. Plus it's backed up by our no-risk "Feel the Difference or Your Money Back!" satisfaction guarantee.

For those individuals who need a higher dose of Vitamin D in a liquid form, we recommend **Liquid Vitamin D3** with 5,000 IU of vegetarian Vitamin D₃ per serving.

Suggested Use: Take 1 packet daily on a full stomach. Open packet, mix contents with 4-8 oz. of water and enjoy. Some caking may occur. This does not affect the quality or integrity of the product.

Allergen Info: Contains no known allergens. **GLUTEN FREE.**

ConcenTrace® is a trade name for concentrated sea minerals from the Great Salt Lake.
