

CYTOMAX® SPORTS PERFORMANCE DRINK delivers energy faster and more efficiently than many sports drinks. The **ADVANCED CARBOHYDRATE SYSTEM (ACS)**, which incorporates multiple carbohydrate energy sources, including our proprietary, **acid buffering** alpha-L-Pyridoxic acid, takes advantage of the body's natural ability to transport and deliver different energy sources (carbohydrates) through multiple unique pathways. Other sports drinks containing lower energy sources are not able to deliver as much energy over the same time interval as Cytomax. Cytomax also incorporates an **AMINO ACID PEPTIDE BLEND** to help keep working muscles and support recovery.

ACS and ENERGY TRANSPORTS

The carbohydrate sources in Cytomax utilize the following pathways: **Multicarboxylate and Dextran** follow the **Glucose Pathway**. **Cristalline Fructose** uses the **Fructose Pathway**. **alpha-L-Pyridoxic acid** uses the **Lactate Pathway**. Water utilizes the **Aquaporin Pathway**.

DIRECTIONS and USE

Mix 1 shot (10g)
into 10-12 FL OZ water

Mix 2 shots (50g)
into 20-24 FL OZ water

Begin drinking 15 minutes before exercise. Drink 5 or every 15 minutes.

Since we founded **Cytosport®** in 1998, we've been dedicated to working with sports scientists, coaches and athletes to produce proven enhanced products for active athletes and serious athletes – supporting performance when it matters.
Over the years, we've expanded to a comprehensive line that encompasses the athlete's experience from pre to post hydration to recovery. Our products are among the very few that are manufactured in an **NSF International GMP for Sport®** Registered facility. Our facilities are also certified and regulated by the FDA. We carefully manufacture our powder products and ready-to-drink products in the state of the art facility located in Bannockburn, California.
Making effective products for athletes and active fitness individuals requires responsibility on all levels. In our facilities, we grow, we test our ingredients, we have made environmental sustainability a focus and we are actively seeking change. For more information, please visit our website.
Through it all, **Cytosport** has been committed to one thing: building athletes from the inside out.
