Klamath Lake Blue Green Algae grows naturally in the clean, mineral-rich waters of Klamath Lake in Southern Oregon, the perfect environment for this wild fresh water algae. It is one of only a few wildcrafted supplements available for consumption, ethically harvested without the use of pesticides, fertilizers or chemicals. This extraordinary algae contains many beneficial phytonutrients plus the pigment called phycocyanin, responsible for the blue-green color of this natural, whole food nutrient.

WARNING: If you are pregnant, nursing or taking any medications, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur. Keep out of reach of children. Store at room temperature. Do not use if seal under cap is broken or missing.
