**America's #1 selling
trace mineral supplement!†**

ConcenTrace® Trace Mineral Drops is an all natural mineral concentrate that's made by using **ConcenFlo™**, our proprietary harvesting process. **ConcenTrace®** contains over 72 naturally occurring ionic trace minerals from the Great Salt Lake with 99% sodium removed.

Ideally, minerals should come from eating a raw food diet. However, even eating a raw food diet isn't enough since researchers have proven that soils have been depleted of minerals. Therefore, if it's not in the soil, it's not in the food. Here's where **ConcenTrace®** comes in—taking **ConcenTrace®** every day ensures you're getting a full spectrum of ionic trace minerals, which are the same kind of bioavailable ionic trace minerals that are found in foods!*

Suggested Use: This product is all natural, highly concentrated, contains no added preservatives, flavors, or sweeteners and has a very strong taste. We recommend mixing it with juice or food and dividing the serving throughout the day to mask the concentrated mineral flavor. Begin regimen by taking 10 drops for 3 consecutive days. Each day thereafter, increase serving by 10

drops up to ½ tsp. (40 drops) once or twice daily. **Children age 2-3:** Take 1 drop for every 5 lbs of body weight. **For regular or sodium restricted diets.**

Re-mineralize Water: Improve the flavor of distilled, reverse osmosis or purified water. Adding 20-40 drops per gallon or to taste (2-4 drops per glass) compares to expensive mineral water.

Minor crystallization may occur, but this does not affect the quality of the product.
