

FUEL FOR THE DRIVEN®

More advanced than simple carb energy drinks, this complete performance supplement provides a superior carbohydrate profile containing an advanced blend of 100 grams of high quality carbohydrates including glucose polymers (the ultimate complex carbohydrate), plus important carb and energy metabolizers.*

Clinical studies suggest a balanced ratio of complex and simple carbohydrates, like those found in Ultra Fuel, provide energy and enhanced recovery, enabling participants to perform longer and produce greater output.* Scientific studies have also shown glucose polymers are direct precursors to glycogen synthesis in muscle.*
