

Curcumin is one of the most promising ingredients for promoting a healthy response to inflammation, which is often attributed to physical exertion.*

Unfortunately, curcumin is poorly absorbed and rapidly excreted, requiring large, continuous doses to achieve an effect.

Curcumin-SR™ is unique in that it delivers curcumin in a special micronized, sustained-release matrix. This means that it is released over time, stays in the blood longer, and is therefore active longer than regular curcumin.*

Clinical research shows that compared with regular curcumin, Curcumin-SR is absorbed faster, has 10x greater bioavailability, and delivers sustained release over 12 hours.
