

Calcium is an essential mineral needed every day for proper health.* 99% of the body's calcium can be found in the bones and teeth. This mineral provides the building blocks that help keep bones and teeth strong and healthy.* In addition, calcium helps to support the health of other systems in the body, including musculoskeletal and nervous systems.* This formulation contains Vitamin D3 to promote calcium absorption.*

Adequate Calcium and Vitamin D as part of a healthful diet, along with physical activity, may reduce the risk of osteoporosis in later life.
