

Glucosamine promotes joint health and nutritionally works to promote the structural framework of healthy joints. Glucosamine and Chondroitin both provide the essential building material glycosaminoglycans which are required for healthy cartilage formation, promoting mobility, range of motion, flexibility and easing of occasional joint stress due to exercise or physical activity. Vitamin C is a precursor of collagen, which is a building block of tendons and ligaments. Manganese plays a role in the production of healthy cartilage compounds.*

Due to the natural variation of the raw material, tablet color and appearance may vary from batch to batch.

† Fully reacted chelates, Albion process patent No.'s 5,516,925 and 6,716,814

†† Naturally occurring; therefore amount may vary.

Carefully Manufactured by:

**Solgar, Inc., 500 Willow Tree Road
