

Resveratrol is a natural polyphenol found in red wine, peanuts and in some plants, including the herb *Polygonum cuspidatum*. It is a small molecule, classified as a stilbene. Polyphenols, such as resveratrol, possess powerful antioxidant properties that help fight cell-damaging free radicals in the body which can contribute to oxidative stress, and in turn may contribute to the premature aging of cells.\* Each vegetable capsule contains more resveratrol than a typical bottle of red wine.
