INHOLTRA®

**Inholtra® Premium Lubri-Joint®: The next step in the evolution of joint health.\***

Glucosamine has been researched for its ability to help support the production of cartilage - which is the natural shock absorber in our joints that prevents bones from rubbing together.\* Building upon this amazing nutrient, Inholtra® Premium Lubri-Joint™ combines a proprietary blend of vitamins, minerals, nutrients and essential fatty acids to support joint and connective tissue health.\*

- **Glucosamine** helps promote the formation of cartilage between joints.\*
- **Chondroitin** is a critical structural component of cartilage and provides resistance against compression with a cushioning effect.\*
- **Essential Fatty Acids** supports whole body health, including the joints and connective tissue.\*
- **Vitamins C and E** help to protect joint tissues from cell-damaging free radicals.\* Vitamin C is also required for the production of collagen, a protein necessary for the formation of connective tissue in cartilage.\*
