

Suggested Usage: Shake well before using. Take 1 to 2 droppersful 2-3 times daily in water or directly on the tongue. Children over 2 years old use half the recommended level.

Bee Propolis is collected from beehives and has naturally occurring flavonoids. Bees collect the Propolis from the resin of certain select trees and use it to line the hive. This substance is believed to be responsible for the sterile, healthy state of the beehive colony.

Caution: Consult physician if pregnant/nursing, taking medication, or have a medical condition. Keep out of reach of children.

Natural color variation may occur in this product.

Please Recycle.
